

# **Call for Papers**

The Second New York Fed / NYU Stern:

## **Summer Climate Finance Conference**

This conference is jointly sponsored by the Federal Reserve Bank of New York, the NYU Stern Climate Finance Initiative, and the Volatility and Risk Institute at NYU Stern. The goal is to bring together researchers interested in the fields of climate and nature finance. All papers related to these topics will be considered, but we are especially interested in:

- The impact of climate migration on economic output, household welfare, and consumption;
- The effects of green pledges on bank lending and economic output;
- The macroeconomic and financial effects of different climate policies;
- The effect of natural disasters and disaster mitigation on output and financial stability;
- The effects of biodiversity loss and its interactions with climate change on economic output;
- The pricing of climate risks across different asset classes;
- The role of insurance markets in managing climate-related risks.

In addition to full-paper presentations, we will have a poster session for current PhD students.

To view last year's program, please go here:

https://www.newyorkfed.org/research/conference/2024/Nyu-nyfed-summer-climate

Interested authors should submit a PDF version of their paper by at https://forms.gle/MGM94ggfvp1zgDcD6

The deadline for submissions is February 28, 2025. Authors of accepted papers will be notified by late-March.
